

# Our Commitment to South Dakota

The Dakota Access Pipeline will deliver greater energy security by lessening our dependence on foreign oil.

The pipeline will create infrastructure to safely transport domestically produced oil, freeing up rail capacity for the transportation of agricultural commodities.

The pipeline will *also* deliver a lot more to South Dakota.

Building the pipeline will create up to 4,000 local jobs and generate an estimated \$38.5 million in tax revenue during construction, plus \$13.5 million in property taxes in the first year the pipeline goes into service.

Clean, affordable, safe domestic energy.

Jobs and revenue for local communities.

Those are our commitments to you.
